## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 5,8,9,11-17 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art cited does not anticipate individually nor teach in combination the following limitations:
  - A lamp housing having a light-emitting opening turned in a direction toward a surface to be illuminated; at least one lamp in said housing for producing light emitted in a light cone toward said surface; and a lens plate disposed across said opening between the lamp and the surface and comprised of a multiplicity of micro lenses directly adjacent one another for rendering the light cone as it passes through said lens plate substantially homogeneous and sharp- edged where said light cone meets said surface, said micro lenses being formed as structuring of at least one surface of said lens plate, said lens plate having an inner surface turned toward said lamp and an outer surface turned away from said lamp and outwardly away from the housing, said inner surface turned toward said lamp being formed with contiguous generally spherical recesses, the outer surface turned away from the lamp being formed with contiguous generally spherical convexities, said convexities and said recesses forming said micro lenses, a spacing ( $\Delta$ ) S between midpoints of adjacent recesses or adjacent convexities being less than 5 mm and greater than 1 mm;
  - A lamp housing adapted to be mounted on a roof or wall of a building and oriented to cast light onto an area to be illuminated, said lamp housing

surrounding an interior space and having a light outlet opening directed toward said area; a lamp in said space for producing light in said housing; and a lens plate in said space spanning said light outlet opening and having a surface turned toward said lamp and another surface turned away from said lamp and toward said area for directing a sharply defined substantially homogeneous light cone onto said area, said surface turned away from said lamp being formed with outwardly directed rounded convexities having apexes defined by arc segments creating micro lenses having center-to-center spacings from one another of less than 5 mm and more than 1 mm, said surface turned toward said lamp being smooth or provided with rounded concavities forming the micro lenses with said rounded convexities.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
